Diving Physiology of Marine Mammals and Seabirds

Paul J. Ponganis

Diving Physiology of Marine Mammals and Seabirds Paul J. Ponganis

Analysing the physiological adaptations of marine mammals and seabirds, this book provides a comprehensive overview of what allows these species to overcome the challenges of diving to depth on a single breath of air. Through comparative reviews of texts on diving physiology and behaviour from the last seventy-five years, Ponganis combines this research into one succinct volume. Investigating the diving performance of marine mammals and seabirds, this book illustrates how physiological processes to extreme hypoxia and pressure are relevant to the advancement of our understanding of basic cellular processes and human pathologies. This book underscores the biomedical and ecological relevance of the anatomical, physiological and molecular/biophysical adaptations of these animals to enable further research in this area. An important resource for students and researchers, this text not only provides an essential overview of recent research in the field, but will stimulate further research into the behaviour and physiology of diving.

From reader reviews:

Nona Whitehouse:

Hey guys, do you want to find a new book you just read? Maybe the book with the headline Diving Physiology of Marine Mammals and Seabirds suitable to you? Typically the book was written by a renowned writer in this era. The book entitled Diving Physiology of Marine Mammals and Seabirds is a single of several books which everyone reads now. This kind of book was inspired many men and women in the world. When you read this publication you will enter the new way of measuring that you ever knew just before. The author explained their plan in a simple way, so all of people can easily be aware of the core of this book. This book will give you a wide range of information about this world now. In order to see the representation of the world in this particular book.

Roberto Fetter:

Is it you actually who have spare time in that case spend it whole day by means of watching television programs or just laying on the bed? Do you need something new? This Diving Physiology of Marine Mammals and Seabirds can be the response to, oh how come? A book you know. You are therefore out of date, spending your spare time by reading in this new era is common not a geek activity. So what do these guides have that the others?

Joshua Nichols:

As we know that book is a vital thing to add our know-how for everything. By a book we can know everything we wish. A book is a pair of written, printed, illustrated as well as blank sheet. Every year has been exactly added. This e-book Diving Physiology of Marine Mammals and Seabirds was filled regarding science. Spend your time to add your knowledge about your science competence. Some people have a different feel when they read any book. If you know how big benefit of a book, you can sense joy to read a publication. In the modern era like right now, many ways to get the book you wanted.

Betty Bowers:

As a pupil exactly feel bored for you to read. If their teacher asked them to go to the library as well as to make a summary for some e-book, they are complained. Just tiny students that have reading's soul or real their hobby. They just do what the professor wants, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that reading through is not important, boring in addition to can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this time, many ways to get whatever we wish. Likewise words say, many ways to reach Chinese's country. So, this Diving Physiology of Marine Mammals and Seabirds can make you sense more interested to read.
