Expert .NET Micro Framework (Expert's Voice in .NET)

Jens Kühner

Expert .NET Micro Framework (Expert's Voice in .NET) Jens Kühner

The Microsoft .NET Micro Framework is a small and efficient .NET runtime environment used to run managed code on devices that are too small and resource constrained for Windows CE and the Compact Framework.

Expert .NET Micro Framework will teach you everything you need to know in order to use the .NET Micro Framework to create effective embedded applications. It begins with the basics of accessing hardware and networking before delving deep into the less well-known areas such as cryptography and globalization, and how to use technologies such as wireless communication that are not directly supported by the .NET Micro Framework.

This book is a must if you want to get as much as possible out of the .NET Micro Framework to write powerful embedded applications.

Expert .NET Micro Framework also describes how to use resources, and write globalized and multilingual embedded applications. You will learn how to effectively use binary serialization to store data permanently in flash memory or exchange data with a PDA or PC. Topics like cryptography and encrypted data exchange with a .NET or Compact Framework application are covered.

What you'll learn

- Describes and compares wireless communication technologies and how to use them even if they are not directly supported by the .NET Micro Framework
- Describes the whole class library and features of the .NET Micro Framework, illustrated by working examples
- Demonstrates how to access hardware components with managed drivers and write applications with a graphical user interface
- Includes a detailed description of how to effectively extend or write hardware emulators using undocumented features of the configuration engine and emulator components

Who this book is for

This book is for anyone with an interest in creating embedded systems. Primarily, it is written for the benefit of .NET developers with a background in C#, but it will equally appeal to hardware developers with a background in Assembler, C, or C++ who will be impressed by the benefits that managed code can bring to their devices.

From reader reviews:

Nancy Lowery:

Nowadays reading books are more than want or need but also be a life style. This reading practice give you lot of advantages. The huge benefits you got of course the knowledge the actual information inside the book this improve your knowledge and information. The info you get based on what kind of e-book you read, if you want get more knowledge just go with education and learning books but if you want really feel happy read one using theme for entertaining for example comic or novel. Often the Expert .NET Micro Framework (Expert's Voice in .NET) is kind of reserve which is giving the reader capricious experience.

Coleen Faircloth:

Information is provisions for those to get better life, information these days can get by anyone with everywhere. The information can be a information or any news even a problem. What people must be consider when those information which is within the former life are hard to be find than now is taking seriously which one is suitable to believe or which one the actual resource are convinced. If you obtain the unstable resource then you buy it as your main information it will have huge disadvantage for you. All those possibilities will not happen throughout you if you take Expert .NET Micro Framework (Expert's Voice in .NET) as your daily resource information.

Jerry Raminex:

People live in this new moment of lifestyle always attempt to and must have the extra time or they will get large amount of stress from both daily life and work. So , once we ask do people have time, we will say absolutely without a doubt. People is human not just a robot. Then we question again, what kind of activity are you experiencing when the spare time coming to a person of course your answer will certainly unlimited right. Then do you try this one, reading guides. It can be your alternative inside spending your spare time, typically the book you have read will be Expert .NET Micro Framework (Expert's Voice in .NET).

Latashia Bartlett:

Playing with family in the park, coming to see the marine world or hanging out with buddies is thing that usually you could have done when you have spare time, and then why you don't try thing that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Expert .NET Micro Framework (Expert's Voice in .NET), it is possible to enjoy both. It is good combination right, you still need to miss it? What kind of hangout type is it? Oh can occur its mind hangout people. What? Still don't buy it, oh come on its referred to as reading friends.
