Operations Management: Contemporary Concepts and Cases (McGraw-Hill/Irwin Series Operations and Decision Sciences) Roger Schroeder, Susan Goldstein, M. Johnny Rungtusanatham

Operations Management: Contemporary Concepts and Cases, is an ideal book for the instructor seeking a short text with cases. This book employs a cross-functional perspective, appealing to non-majors and practical for use in an MBA level course in operations management. The size and price of the book also make the text attractive for the cross-functional curriculum where students are required to purchase more than one text. The cases offer variety in length and rigor; and several are from Harvard and Darden. This mix makes the book appropriate for both undergraduates and MBA students.
