When dead presidents in a supernatural world play the board game of world conquest, their moves are carried out in the human world. Leaders are born and dictators rise to power as presidents past such as Teddy Roosevelt, Abe Lincoln, Dwight Eisenhower, and others, plot their moves. One of them makes a move, and an invasion takes place on Earth. In the supernatural world, it's about strategy, wits, and the will to win. On Earth, however, it's an action and adventure story featuring a psychopathic dictator threatening the United States, and the boy who will grow up to stop him from taking over the world. It might seem impossible, but history is being determined before it actually happens. In the end, it's all about leadership, and little Pauli Campo emerges from his meager existence to lead his country in the fight to avert a world war that could lead to the deaths of millions of people. This is the unGame, and the struggle for world domination continues with each roll of the dice in Presidential Risk.
