Mathematics for Physics: A Guided Tour for Graduate Students

Michael Stone, Paul Goldbart

Mathematics for Physics: A Guided Tour for Graduate Students Michael Stone, Paul Goldbart

An engagingly-written account of mathematical tools and ideas, this book provides a graduate-level introduction to the mathematics used in research in physics. The first half of the book focuses on the traditional mathematical methods of physics - differential and integral equations, Fourier series and the calculus of variations. The second half contains an introduction to more advanced subjects, including differential geometry, topology and complex variables. The authors' exposition avoids excess rigor whilst explaining subtle but important points often glossed over in more elementary texts. The topics are illustrated at every stage by carefully chosen examples, exercises and problems drawn from realistic physics settings. These make it useful both as a textbook in advanced courses and for self-study.

From reader reviews:

Peter Gomez:

Nowadays reading books be than want or need but also turn into a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The data you get based on what kind of publication you read, if you want send more knowledge just go with education and learning books but if you want truly feel happy read one using theme for entertaining for instance comic or novel. The particular Mathematics for Physics: A Guided Tour for Graduate Students is kind of guide which is giving the reader capricious experience.

Aaron Covington:

This Mathematics for Physics: A Guided Tour for Graduate Students are usually reliable for you who want to certainly be a successful person, why. The reason why of this Mathematics for Physics: A Guided Tour for Graduate Students can be among the great books you must have is definitely giving you more than just simple looking at food but feed an individual with information that might be will shock your before knowledge. This book is definitely handy, you can bring it all over the place and whenever your conditions in e-book and printed types. Beside that this Mathematics for Physics: A Guided Tour for Graduate Students forcing you to have an enormous of experience including rich vocabulary, giving you trial of critical thinking that we know it useful in your day pastime. So , let's have it appreciate reading.

Paul Leavens:

The book with title Mathematics for Physics: A Guided Tour for Graduate Students has a lot of information that you can study it. You can get a lot of advantage after read this book. This particular book exist new know-how the information that exist in this publication represented the condition of the world today. That is important to yo7u to learn how the improvement of the world. That book will bring you in new era of the internationalization. You can read the e-book with your smart phone, so you can read this anywhere you want.

Pat Thomas:

Are you kind of active person, only have 10 or 15 minute in your time to upgrading your mind expertise or thinking skill even analytical thinking? Then you are receiving problem with the book when compared with can satisfy your short time to read it because this all time you only find publication that need more time to be examine. Mathematics for Physics: A Guided Tour for Graduate Students can be your answer given it can be read by you actually who have those short extra time problems.
