International Differences in Entrepreneurship (National Bureau of Economic Research Conference Report)

International Differences in Entrepreneurship (National Bureau of Economic Research Conference Report)

Often considered one of the major forces behind economic growth and development, the entrepreneurial firm can accelerate the speed of innovation and dissemination of new technologies, thus increasing a country's competitive edge in the global market. As a result, cultivating a strong culture of entrepreneurial thinking has become a primary goal throughout the world.

Surprisingly, there has been little systematic research or comparative analysis to show how the growth of entrepreneurship differs among countries in various stages of development. *International Differences in Entrepreneurship* fills this void by explaining how a country's institutional differences, cultural considerations, and personal characteristics can affect the role that entrepreneurs play in its economy. Developing an understanding of the origins of entrepreneurs as well as the choices they make and the complexity of their activities across countries and industries are of central importance to this volume. In addition, contributors consider how environmental factors of individual economies, such as market regulation, government subsidies for banks, and support for entrepreneurial culture affect the industry and the impact that entrepreneurs have on growth in developing nations.
