## Occupation-Based Activity Analysis Heather Thomas PhD OTR/L

Occupational therapists use occupations and activities as not just a goal, but also as a treatment medium, therefore, they must understand both the uniqueness of a client's occupations and how an activity can be used therapeutically. To analyze the complexity of an occupation takes much more depth of understanding of the person engaging in it, his or her environment, and the uniqueness of the occupation a person has chosen.

The new *Second Edition* of *Occupation-Based Activity Analysis* continues the tradition of teaching students and clinicians the process of conducting activity analyses and occupation-based activity analyses.

Dr. Heather Thomas has updated *Occupation-Based Activity Analysis, Second Edition* to reflect the significant changes made to the activity analysis process and terminology in the *Occupational Therapy Practice Framework, Third Edition*.
