Superforecasting: The Art and Science of Prediction Philip Tetlock, Dan Gardner

From one of the world's most highly regarded social scientists, a transformative book on the habits of mind that lead to the best predictions.

Everyone would benefit from seeing further into the future, whether buying stocks, crafting policy, launching a new product, or simply planning the week's meals. Unfortunately people tend to be terrible forecasters. As Wharton professor Philip Tetlock showed in a landmark 2005 study, even experts' predictions are only slightly better than chance. However, an important and underreported conclusion of that study was that some experts do have real foresight, and Tetlock has spent the past decade trying to figure out why. What makes some people so good? And can this talent be taught?

In *Superforecasting*, Tetlock and coauthor Dan Gardner offer a masterwork on prediction, drawing on decades of research and the results of a massive, government-funded forecasting tournament. The Good Judgment Project involves tens of thousands of ordinary people - including a Brooklyn filmmaker, a retired pipe installer, and a former ballroom dancer - who set out to forecast global events. Some of the volunteers have turned out to be astonishingly good. They've beaten other benchmarks, competitors, and prediction markets. They've even beaten the collective judgment of intelligence analysts with access to classified information. They are "superforecasters".

In this groundbreaking and accessible book, Tetlock and Gardner show us how we can learn from this elite group. Superforecasting offers the first demonstrably effective way to improve our ability to predict the future - whether in business, finance, politics, international affairs, or daily life - and is destined to become a modern classic.

From reader reviews:

Lisa Auyeung:

Nowadays reading books become more and more than want or need but also be a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge your information inside the book that improve your knowledge and information. The information you get based on what kind of publication you read, if you want get more knowledge just go with education and learning books but if you want really feel happy read one having theme for entertaining for instance comic or novel. The actual Superforecasting: The Art and Science of Prediction is kind of reserve which is giving the reader capricious experience.

Dena Jacobs:

The reserve untitled Superforecasting: The Art and Science of Prediction is the e-book that recommended to you to learn. You can see the quality of the book content that will be shown to a person. The language that author use to explained their way of doing something is easily to understand. The copy writer was did a lot of investigation when write the book, and so the information that they share for you is absolutely accurate. You also could possibly get the e-book of Superforecasting: The Art and Science of Prediction from the publisher to make you considerably more enjoy free time.

Kerry Erdman:

Many people spending their time by playing outside having friends, fun activity along with family or just watching TV 24 hours a day. You can have new activity to spend your whole day by reading through a book. Ugh, ya think reading a book can really hard because you have to take the book everywhere? It fine you can have the e-book, having everywhere you want in your Cell phone. Like Superforecasting: The Art and Science of Prediction which is keeping the e-book version. So , try out this book? Let's observe.

Phyllis Belser:

As a college student exactly feel bored for you to reading. If their teacher expected them to go to the library or make summary for some e-book, they are complained. Just very little students that has reading's heart and soul or real their leisure activity. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading significantly. Any students feel that studying is not important, boring as well as can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this Superforecasting: The Art and Science of Prediction can make you feel more interested to read.
