This new volume of the **Biopsy Interpretation Series** addresses biopsies of the uterine cervix and corpus (endometrium) in one text. It provides a practical approach to some of the most common biopsy material encountered by surgical pathologists. Normal histology, non-neoplastic conditions, and neoplasia of the cervix and uterine body are covered using current terminology and concepts. Emphasis is on morphologic features and immunohistochemistry in the diagnostic material. Close attention is given to differential diagnoses, including benign mimics of tumors. The book features over 300 full-color images.

A companion Website will provide over 2,300 color images, plus a test bank that is ideal for board exam preparation.
