Accounting Ethics Ronald Duska, Brenda Shay Duska

The authors systematically explore the new range of ethical issues which have emerged in recent years, including the significant impact on approaches to ethical problems which resulted from the Sarbanes-Oxley Act, the financial crisis of 2008, and the move to replace GAAP with the International Financial Reporting Standards (IFRS).

The audiobook begins by investigating the nature and purpose of accounting and follows with a brief study of the nature and use of ethical principles in determining accountants' responsibilities; it examines the ethical imperatives that bind professionals and the specific principles and rules that various accounting codes dictate.

Next, the audiobook explores the major types of practices in which accountants engage - auditing, managerial accounting, and tax accounting - and the responsibilities associated with those practices. The new topics are addressed in a section which highlights the debates over the use of fair-value accounting and principles- versus rules-based standards.
