Concurrent and Real-Time Programming in Ada

Alan Burns, Andy Wellings

Concurrent and Real-Time Programming in Ada Alan Burns, Andy Wellings

Ada is the only ISO-standard, object-oriented, concurrent, real-time programming language. It is intended for use in large, long-lived applications where reliability and efficiency are essential, particularly real-time and embedded systems. In this book, Alan Burns and Andy Wellings give a thorough, self-contained account of how the Ada tasking model can be used to construct a wide range of concurrent and real-time systems. This is the only book that focuses on an in-depth discussion of the Ada tasking model. Following on from the authors' earlier title *Concurrency in Ada*, this book brings the discussion up to date to include the new Ada 2005 language and the recent advances in real-time programming techniques. It will be of value to software professionals and advanced students of programming alike: indeed every Ada programmer will find it essential reading and a primary reference work that will sit alongside the language reference manual.

From reader reviews:

Daisy Richardson:

Do you one among people who can't read gratifying if the sentence chained in the straightway, hold on guys this kind of aren't like that. This Concurrent and Real-Time Programming in Ada book is readable by means of you who hate the straight word style. You will find the information here are arrange for enjoyable looking at experience without leaving also decrease the knowledge that want to provide to you. The writer involving Concurrent and Real-Time Programming in Ada content conveys the thought easily to understand by lots of people. The printed and e-book are not different in the content but it just different as it. So , do you nonetheless thinking Concurrent and Real-Time Programming in Ada is not loveable to be your top collection reading book?

Hugo Mann:

People live in this new day time of lifestyle always try and and must have the time or they will get wide range of stress from both lifestyle and work. So , once we ask do people have spare time, we will say absolutely sure. People is human not really a huge robot. Then we question again, what kind of activity do you have when the spare time coming to an individual of course your answer will certainly unlimited right. Then do you try this one, reading publications. It can be your alternative within spending your spare time, often the book you have read is usually Concurrent and Real-Time Programming in Ada.

Keven Peterson:

Is it an individual who having spare time after that spend it whole day by means of watching television programs or just laying on the bed? Do you need something new? This Concurrent and Real-Time Programming in Ada can be the solution, oh how comes? A fresh book you know. You are thus out of date, spending your time by reading in this brand-new era is common not a nerd activity. So what these ebooks have than the others?

Diana Johnson:

As a university student exactly feel bored in order to reading. If their teacher questioned them to go to the library or make summary for some e-book, they are complained. Just very little students that has reading's heart and soul or real their passion. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that reading through is not important, boring and also can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Concurrent and Real-Time Programming in Ada can make you truly feel more interested to read.
