The **Color Atlas of "*Xenopus laevis*" Histology** provides the first central source on the microscopic anatomy of cells, tissues, and major organs of the adult South African clawed frog, *Xenopus laevis*. For many years, *X. laevis* has been a highly popular experimental animal model in many areas of research. The recent development of transgenic *Xenopus* technology offers the promise that this animal model will be utilized more than ever before. The purpose of this book is to provide the active researcher with a central source of high quality light microscopic color images of the tissues of *X. laevis*, to aid in the identification of the cells and tissues of interest.
