Toxicology and Epigenetics

Toxicology and Epigenetics

Epigenetics is the study of both heritable and non-heritable changes in the regulation of gene activity and expression that occur without an alteration in the DNA sequence. This dynamic and rapidly developing discipline is making its impact across the biomedical sciences, in particular in toxicology where epigenetic differences can mean that different individuals respond differently to the same drug or chemical.

Toxicology and Epigenetics reflects the multidimensional character of this emerging area of toxicology, describing cutting-edge molecular technologies to unravel epigenetic changes, the use of *in vivo* and *in vitro* models, as well as the potential use of toxicological epigenetics in regulatory environments. An international team of experts consider the interplay between epigenetics and toxicology in a number of areas, including environmental, nutritional, pharmacological, and computational toxicology, nanomaterials, proteomics and metabolomics, and cancer research.

Topics covered include:

- environment, epigenetics and diseases
- DNA methylation and toxicogenomics
- chromatin at the intersection of disease and therapy
- epigenomic actions of environmental arsenicals
- environment, epigenetics and cardiovascular health
- toxicology, epigenetics and autoimmunity
- ocular epigenomics: potential sites of environmental impact in development and disease
- nuclear RNA silencing and related phenomena in animals
- epigenomics – impact for drug safety sciences
- methods of global epigenomic profiling
- transcriptomics: applications in epigenetic toxicology

Toxicology and Epigenetics is an essential insight into the current trends and future directions of research in this rapidly expanding field for investigators, toxicologists, risk assessors and regulators in academia, industry and government.

From reader reviews:

Nancy Rush:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to be aware of everything in the world. Each publication has different aim or perhaps goal; it means that e-book has different type. Some people really feel enjoy to spend their time for you to read a book. They are really reading whatever they get because their hobby is reading a book. Think about the person who don't like reading through a book? Sometime, man or woman feel need book whenever they found difficult problem or even exercise. Well, probably you will require this Toxicology and Epigenetics.

Scott Marin:

This Toxicology and Epigenetics usually are reliable for you who want to be a successful person, why. The explanation of this Toxicology and Epigenetics can be among the great books you must have is actually giving you more than just simple examining food but feed an individual with information that possibly will shock your previous knowledge. This book is usually handy, you can bring it everywhere and whenever your conditions throughout the e-book and printed versions. Beside that this Toxicology and Epigenetics giving you an enormous of experience such as rich vocabulary, giving you test of critical thinking that we all know it useful in your day pastime. So , let's have it and enjoy reading.

Angela Kiefer:

That publication can make you to feel relax. This kind of book Toxicology and Epigenetics was colorful and of course has pictures on the website. As we know that book Toxicology and Epigenetics has many kinds or genre. Start from kids until teens. For example Naruto or Private investigator Conan you can read and think that you are the character on there. Therefore , not at all of book are usually make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading which.

Betty Neal:

What is your hobby? Have you heard that question when you got scholars? We believe that that query was given by teacher to their students. Many kinds of hobby, All people has different hobby. And also you know that little person such as reading or as reading become their hobby. You must know that reading is very important in addition to book as to be the thing. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You get good news or update with regards to something by book. Numerous books that can you choose to adopt be your object. One of them is this Toxicology and Epigenetics.
